<i>National averages pregnancy per IUI</i>	10-20%	10%	10%	2-5%	

When patients meet with Dr. Craig, they are often surprised to learn that in vitro fertilization (IVF) may not be their first course of treatment. In reality, most patients start with a more basic treatment option. In fact, **74% of treatment cycles include ovulation induction and intrauterine insemination (IUI)**—basic treatments requiring less medication and fewer monitoring appointments with a lower cost.
